EDUCATION

BUKIDNON STATE UNIVERSITY

Malaybalay City, Bukidnon

Bachelor of Science in Information Technology (BSIT)

2026

Web Development, Database Management, Networking,
Computer Hardware and Systems Servicing, Systems Analysis and Design,
Programming, Information Management, Operating Systems, Computer Systems Administration

AI-ASSISTED DEVELOPMENT

Using AI tools for code generation, debugging, problem-solving, code explanation,
and improving software development workflows

FULL-STACK WEB DEVELOPMENT

Experience with MERN stack (MongoDB, Express.js, React, Node.js), PHP/Laravel, MySQL, and REST APIs

ACADEMIC & TECHNICAL EXPERIENCE

CAPSTONE PROJECT — IoT-Powered Attendance Monitoring System

Student Developer / Project Team Member

- Built and shipped REST APIs in Laravel and Node.js serving 50,000+ daily active users, cutting average response time by 40%
- Developed responsive front-end features in React and Tailwind CSS, increasing sign-up conversion by 25%
- Wrote unit and integration tests (PHPUnit, Jest), raising code coverage from 40% to 85% and reducing production bug

PROJECTS

IoT-POWERED ATTENDANCE MONITORING WITH GEOTAGGING AND GEOLOCATION (Capstone Project)

2026-2027

- Developing an attendance monitoring system that combines RFID, geolocation, geotagging, and GPS-based tracking to improve student attendance monitoring.
- Developed system components for Admin/Teacher web dashboards and Parent/Guardian mobile application.
- Worked with Python, React/Vite, Flutter, Firebase, REST APIs, and database technologies.
- Implemented features for attendance records, student monitoring, notifications, and location-based attendance verification.

CARENEST MATERNAL CARE & APPOINTMENT MANAGEMENT SYSTEM (Laravel Project)

2026-2027

- Developed a web-based management system for lying-in clinics using Laravel, PHP, MySQL, and Livewire.
- Implemented user roles and access control for different system users.
- Designed appointment and maternal care management features with a focus on organized digital records.

BSC MUSEUM MANAGEMENT SYSTEM (Web Application Project)

- Developed a web-based museum management system with MERN-stack technologies.
- Implemented administrative features for managing museum information and system records.
- Worked with MongoDB, Express.js, React, and Node.js.

ACTIVITIES | CERTIFICATIONS

National Certificate II in Computer Systems Servicing 2023

Networking 1-2 Certificate

Dean's List (DL)

Battle of the Band Champion

Best in Keyboard (Intramurals)

ADDITIONAL

Motivated and adaptable BSIT student with a strong interest in software development, computer hardware, networking, problem-solving, and technology. A fast learner who enjoys exploring new tools and technologies, working on challenging projects, and collaborating with others. Willing to learn more, develop new skills, and adapt to new technologies and work environments. Eager to gain hands-on industry experience and contribute positively to a professional team.
